## Project Mock-Ups

### Main Page – User not logged in

The mockup shows a web interface for 'TimeTrack'. At the top, a dark header contains the site name 'TimeTrack', a 'Current task description' section with 'Tag1' and 'Tag2' buttons, a green box with '\$ ProjectName - Category', and a clock showing '20:11' with 'Start 11:11' and 'Current 11:31' labels. A red 'Log In' button is on the right. Below the header, a 'Today' section lists two tasks. Each task has a description, a green 'ProjectName - Category' box, and a time range. A yellow callout box on the left explains that only logged-in users can track tasks beyond one day. Another yellow callout box points to the task list, stating that only actions like log-in, start/stop tracking, and delete/edit current tasks are available for non-logged-in users. A third yellow callout box points to the 'Log In' button, stating it starts/stops the task. At the bottom, there are links for 'Contact us' and 'Log In'.

Only logged in users can track tasks beyond one day. Data for non-logged in user would be stored in session storage

Only actions user can take while not logged in are: log-in, start/stop tracking and delete/edit current tasks

This button starts/stops task

Contact us | Log In

All edits of the tasks will be done in page, effectively it will be a number of forms that can be edited when user double clicks on any element of a form. Form is submitted on person leaving form element or hitting "Enter" button via AJAX so the page does not reload.

### Main Page – User log in/registration

This mockup shows the same 'TimeTrack' interface but with a login and registration form overlaid on the right side. The form has a red header 'Log In' and contains input fields for 'Email Address' and 'Password'. Below these are 'Registration' and 'Log In' buttons. A yellow callout box on the left explains the registration process: 'You can register by supplying email and password. You would need to confirm an email by opening a link set to it before you can complete registration.' The 'Log In' button in the form is highlighted with a blue arrow pointing to it. The bottom of the page still shows 'Contact us' and 'Log In' links.

You can register by supplying email and password. You would need to confirm an email by opening a link set to it before you can complete registration.

Contact us | Log In

User can login or register via a login form. All data is submitted via AJAX and once validated user will see a success or error message displayed by in-browser capabilities (via JavaScript)

## Main Page – User logged in

**TimeTrack** | Current task description | \$ ProjectName - Category | 20:11 | Start 11:11 | Current 11:31 | Log Out

**Today**

Task description 1 - blah balh blah and some more blah	\$ 11:01 - 11:08	7:11
ProjectName - Category		

Task description 2 - blah balh blah and some more blah	\$ 10:01 - 10:36	35:21
ProjectName - Category		

**October 28, 2016**

Task description 3 - blah balh blah and some more blah	\$ 12:11 - 14:46	1:35:39
ProjectName - Category		

Search Tasks... | Contact us | My Account

People can double-click any item in the task to change it. (I.e. they can double click the start time and enter new time changing both total and changed time)

## Report Page

**TimeTrack** | Current task description | \$ ProjectName - Category | 20:11 | Start 11:11 | Current 11:31 | Log Out

**Report** | Start: 4/22/2012 | End: 4/22/2012 | Filter: Tags | People

<b>Total</b>	<b>21h 1m</b>
ProjectName	2h 45m
ProjectName 2	10h 5m
ProjectName 3	8h 11m
Category 1	2h 11m
Category 2	4h 0m
Category 3	2h 0m
Task description 1	0h 30m
Task description 2	1h 15m
Task description 3	0h 15m
